CAREER OBJECTIVE

Dedicated MCA student with a strong foundation in application development, backend development, and database management. Skilled in Flutter, Spring Boot, REST APIs, Firebase, and SQL, with hands-on experience building full-stack and AI-powered applications through academic and industry projects. Seeking an Application Developer role where I can build scalable solutions, contribute to impactful projects, and continue growing as a software engineer.

EDUCATIONAL BACKGROUND

- **Master of Computer Applications (MCA)**, MET Institute of Computer Science, Mumbai University, Mumbai — 2027, 8.25 CGPA
- **Bachelor's Degree (BCA)**, Thakur Shyamnarayan Degree College, YCMOU, Mumbai — 2025, 7.02 CGPA
- **Higher Secondary Certificate (HSC)**, VIVA College, Maharashtra State Board, Mumbai — 2022, 78.83%
- **Secondary School Certificate (SSC)**, National English High School, Maharashtra State Board, Mumbai — 2020, 76%

ACADEMIC PROJECTS

- **AshaSathi — AI-Powered Offline Healthcare Management System:**

Developed an offline-first healthcare application using Flutter, Spring Boot, PostgreSQL, SQLite, Python FastAPI, PaddleOCR, and Gemini AI to help ASHA workers manage patient and family health records in low-connectivity rural areas. Implemented intelligent medical document processing with OCR and AI to automatically extract prescriptions, medicine details, and lab results, along with a background sync engine for seamless offline-to-online data synchronization and secure JWT-based authentication.

- **AI Expense Auditor Agent:**

Developed a full-stack AI-assisted expense auditing system using Flutter, Python, FastAPI, Pandas, NumPy, and Ollama for automated expense analysis. Designed REST APIs, implemented data cleaning and enrichment pipelines, performed fraud detection, risk scoring, and compliance analysis, and built a dashboard for visualizing audit reports and AI-generated insights.

- **AI-Powered Student Study Material Sharing Portal:**

Tech Stack: Spring Boot, Spring Security, JWT, MySQL, REST APIs, AI API

- Developed the complete backend architecture, including authentication, database design, and REST APIs.
- Implemented secure file management and metadata storage for academic resources.
- Integrated an AI service to automatically summarize uploaded study materials, improving content accessibility and searchability.
- Designed scalable backend modules following a feature-based architecture.

INTERNSHIP / TRAINING EXPERIENCE

- **Application Developer Intern**, GROBIIT, Mumbai, Maharashtra (Present)

Develop and maintain custom mobile applications based on business requirements using Flutter, Spring Boot, and Firebase. Collaborate with the team to design, implement, and integrate frontend interfaces, backend APIs, databases, and third-party services while ensuring application performance, scalability, and code quality. Contribute to feature enhancements, bug fixes, and deployment across multiple client projects.
